THE PHILOSOPHY

Our main mission will always be to invest your capital in the safest place possible. We believe in long-term investment strategies in sound companies and financial firms that follow ethical and fair trade and business practices.

A|B's capital markets investments focus on current and future Fortune 500 companies in America. We believe strongly in the American economy and the future impact of its companies on global financial and consumer markets.

As we all know, investing can be difficult and deciding which company is best to invest in is nearly impossible without following the day-to-day operations of a particular company and utilizing the latest technologies. A|B's mission is to advise and help individuals, businesses, communities and families make wise financial decisions.

In this presentation, you will learn more about our various options for long-term investing. We hope to show you how to choose the best option for your needs and lifestyle. Investing for the future generation and the greater good.

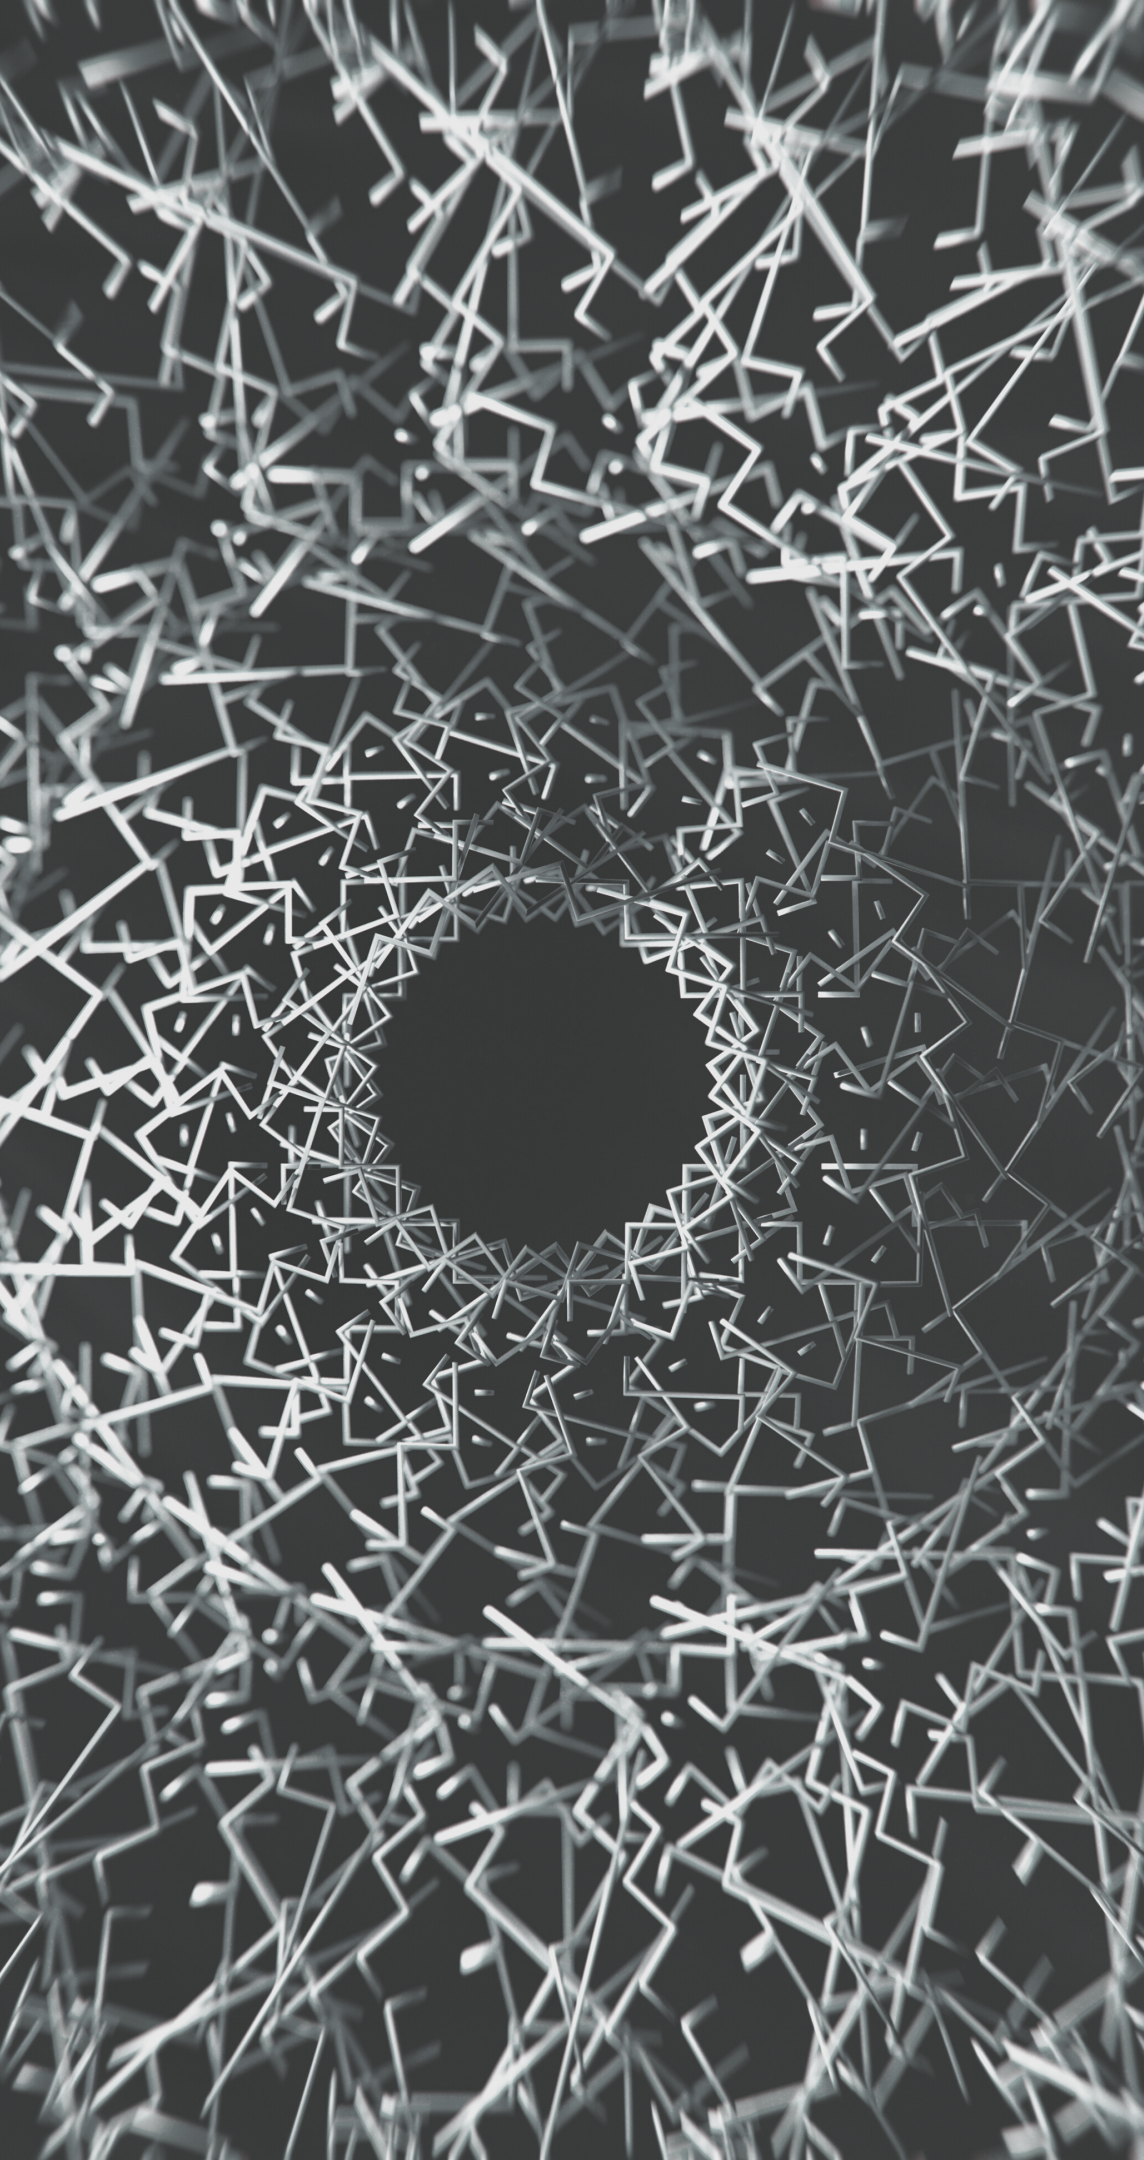

A QUANTITY SYSTEM

A TRUSTED PARTNER AND PLATFORM

A|B digital asset holdings (not traditional financial products) runs on the Quantity network. It is a secure, encrypted digital ledger that handles numerous financial interactions through various DAOs (Decentralized Autonomous Organizations) created to reconcile, respond, and execute on certain agreed-upon terms. This decentralization in processing decisions and reaching consensus among groups not only provides security and transparency, but also a simple process for onboarding users. All they need to do is scan a QR or Q-code to gain access to the network. After an AML/KYC process, you can access many different digital financial assets and platforms. Users can log on to various DAS to take care of their financial needs and transactions.

A DAS (Decentralized Autonomous System) is a universal and global financial platform that is completely self-managing, but always acts according to the desires and conditions of the nodes (users). It is a coded condition that is executed when certain conditions and specifics are met.

A DAS assigns voting rights to investors in proportion to the shares they hold in the group. Investors can propose how the funds/assets should be spent, when and how, and by whom. These organizations are fully transparent and decentralized, registering and verifying all the necessary information of the participants in the network.

TECHNOLOGY OF FUTURE ASSETS MANAGEMENT

By building on the platforms of DAO and DAS, we create and guide each new system and network. It is, in fact, the birth of a financial institution and a company. DAOs is the beginning of a new secure technology that allows us to fully trust our investment strategy and know that we do not need third party partners to custody, decide or advise our finances.

It can be thought of as a safe and secure circle with shared beliefs and strategies.

DAS  QUANTITY

FUTURE OF FINTECH

A NEW DECENTRALIZED AUTONOMOUS SYSTEMS

A DAS (Decentralized Autonomous System) is a universal and global financial platform that is completely self-managing, but always acts according to the desires and conditions of the nodes (users). It is a coded condition that is executed when certain instructions and specifics are met.

A DAS assigns voting rights to investors in proportion to the shares they hold in the group. Investors can propose how the money should be spent, when and how, and by whom. These organizations are fully transparent and decentralized, registering and verifying all the necessary information of the participants in the network.

DLT - A SAFER AND FASTER WAY

Distributed Ledger Technology (DLT) is a secure way to store and transmit data. Data on DLT is stored in blocks secured with advanced cryptography so it cannot be altered by malicious actors. So when you want to send money to someone, you scan their QR or Q code and the transaction is executed almost instantly. Without any middlemen.

There are many ways to use blockchain technology in our financial systems, but one of the most popular is DeFi (Decentralized Finance). DeFi wallets are connected through a global network, which means that transactions can take place anywhere and at any time. These wallets provide secure and instant transactions without the interference of third parties - such as banks or payment processors.

DeFi IN BANKING

The advantages of DeFi (decentralized finance) are certainly no longer to be overlooked. The power to hold your assets will lead to a democratization of finance and wealth. With A|B, you can invest in pools of investors without the intervention of a third party.

Decentralized financial products will soon be available at banks and other regulated institutions, where the deep knowledge of long-term investing is often found.

That's why we involve our capital partners in decision making and writing fundamental fund theses when we create the Genesis Block of our networks, chains and financial products.

TRADING & AI TECHNOLOGY

There are many developments in the field of artificial intelligence that are now being used in business. The most recent development in finance is the use of AI. It is characterized by being programmed to make decisions and act automatically. These are algorithms that track and develop patterns and introduce and execute strategies based on various events. Very often much more reliable than human interaction.

AI has been used in trading for many years, but in recent years we have seen a sharp increase in its use. AI has enabled traders to make better decisions by not having to spend time on tedious tasks like data entry or gathering information from multiple sources. Bots and DAOs execute buy and sell orders automatically without the need for human intervention. They are hopefully the new engine for well-made and sound financial decisions.

INVESTMENT FUNDS

THE INVESTMENT FUNDS

A|B funds and underlying strategies are constantly changing in response to new technologies, advances in consumer behavior, and regulations. To remain competitive in this rapidly evolving environment, it is important for us to share the latest and greatest innovations with the public. As a result, A|B's systems and financial products can be readily adopted by any regulated financial institution. By using A|B's financial technologies, we are able to optimize returns or even generate higher returns than many other types of investments in the traditional markets.

The private investment funds are launched, managed and controlled by professional, certified and trained individuals or team groups of A|B to guarantee you financial security.

We always strive to achieve high performance according to your investment strategy and profile.

A|B Traditional Capital Markets

Private investment funds in international and US regulated markets.

US Mutual Fund

Investing in Fortune 500 USA companies

U.S Private Pension Fund

Investing in diverse and emerging US markets -500 + / - companies

Universal Pension Fund

A diverse investment pool of 1000 + / - innovative international entities

US Mutual Bank Fund

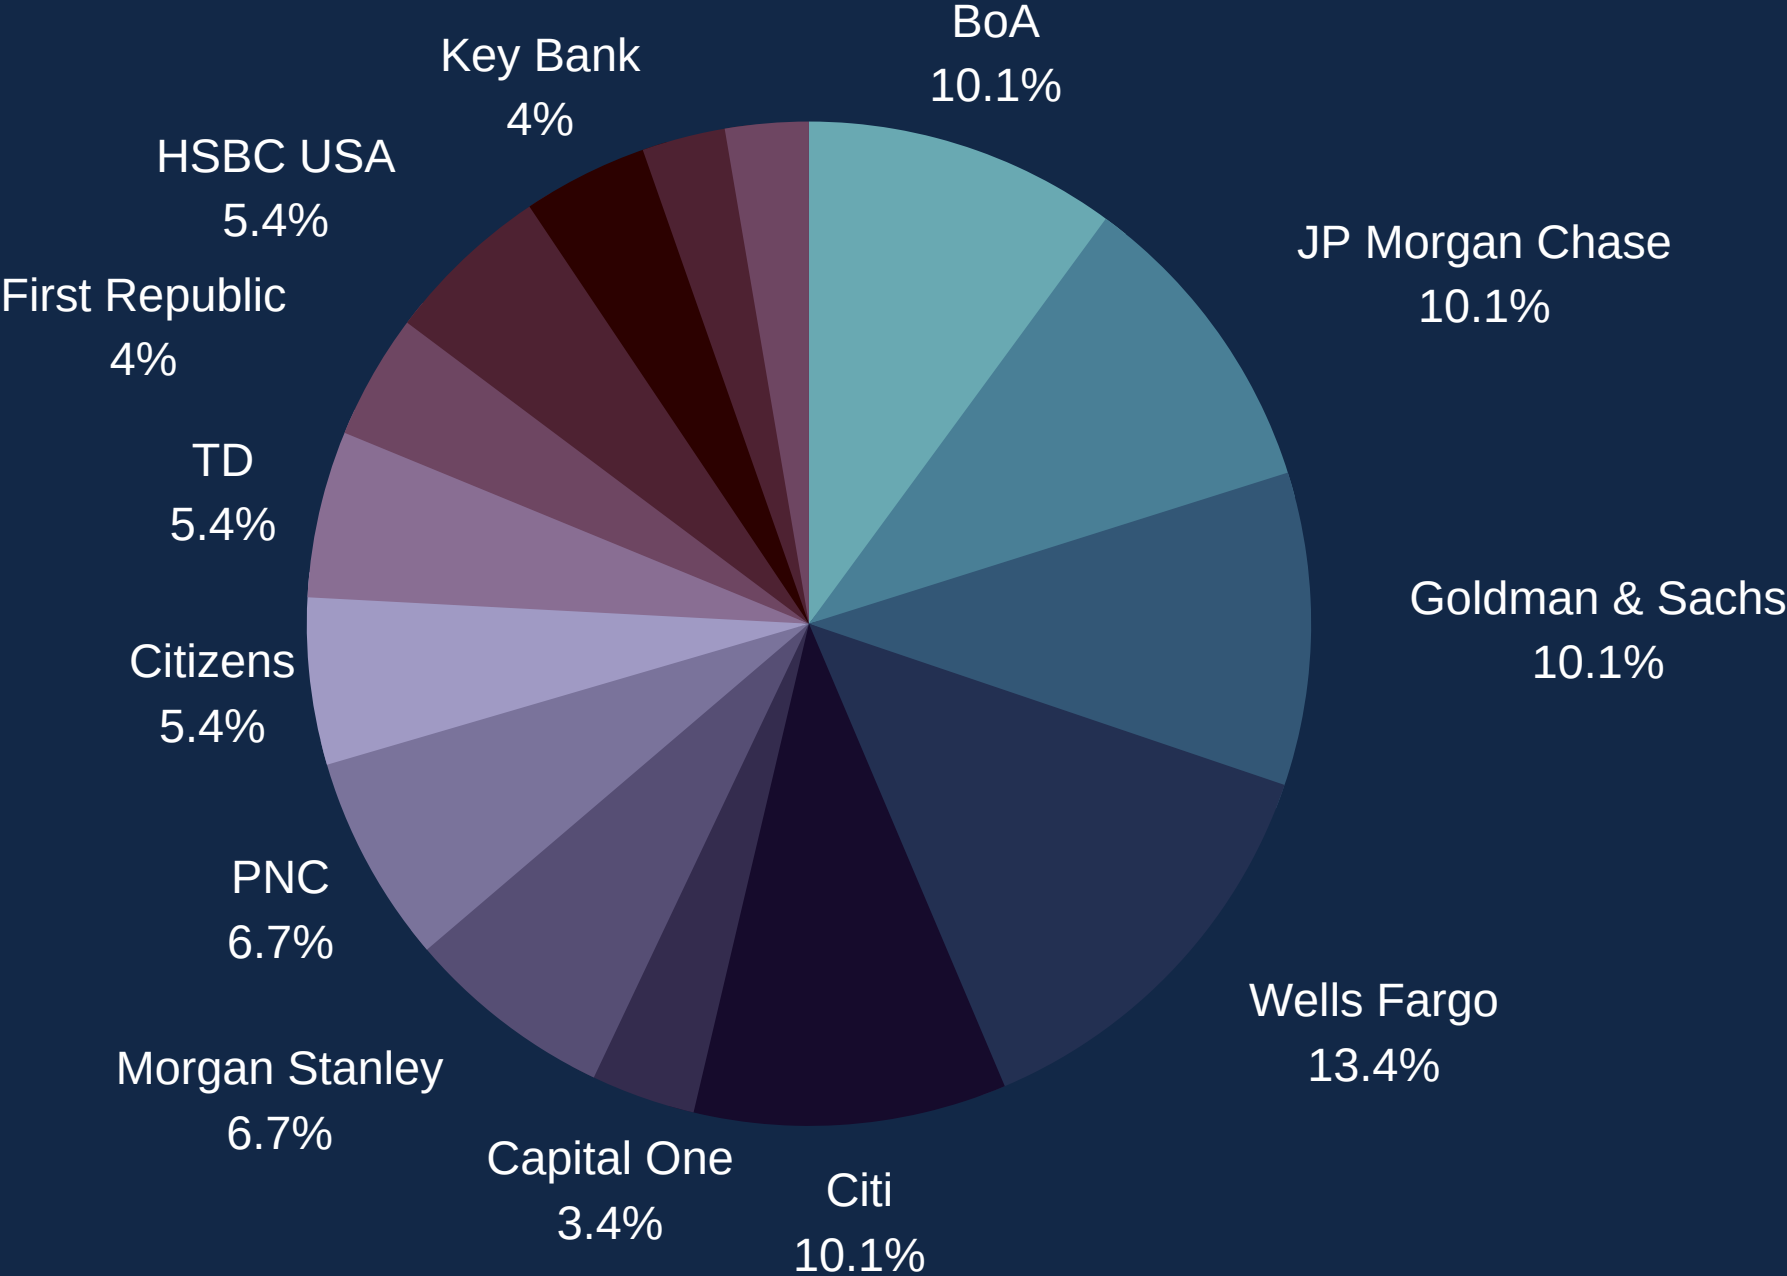

US largest banks and financial institutions

A|B MUTUAL US BANKS FUND

Diversified US Mutual Banks Fund
A|B investment strategies with a unique set of principles.
Only for long terms investments - min. 2 years

US MUTUAL BANKS FUND 2022

Digital Asset Funds

Investing broadly in global digital asset funds and DeFi vehicles, start up projects and leading staking pools

Master Tech Fund

Investing in top 100 + / - US & Asian MediTech, SuisTech (sustainable tech) and general fintech companies

New Emerging Markets Fund

A diverse investment pool of 50 + / - emerging international markets. (Africa, Asia, Europe)

A|B Mutual Fund

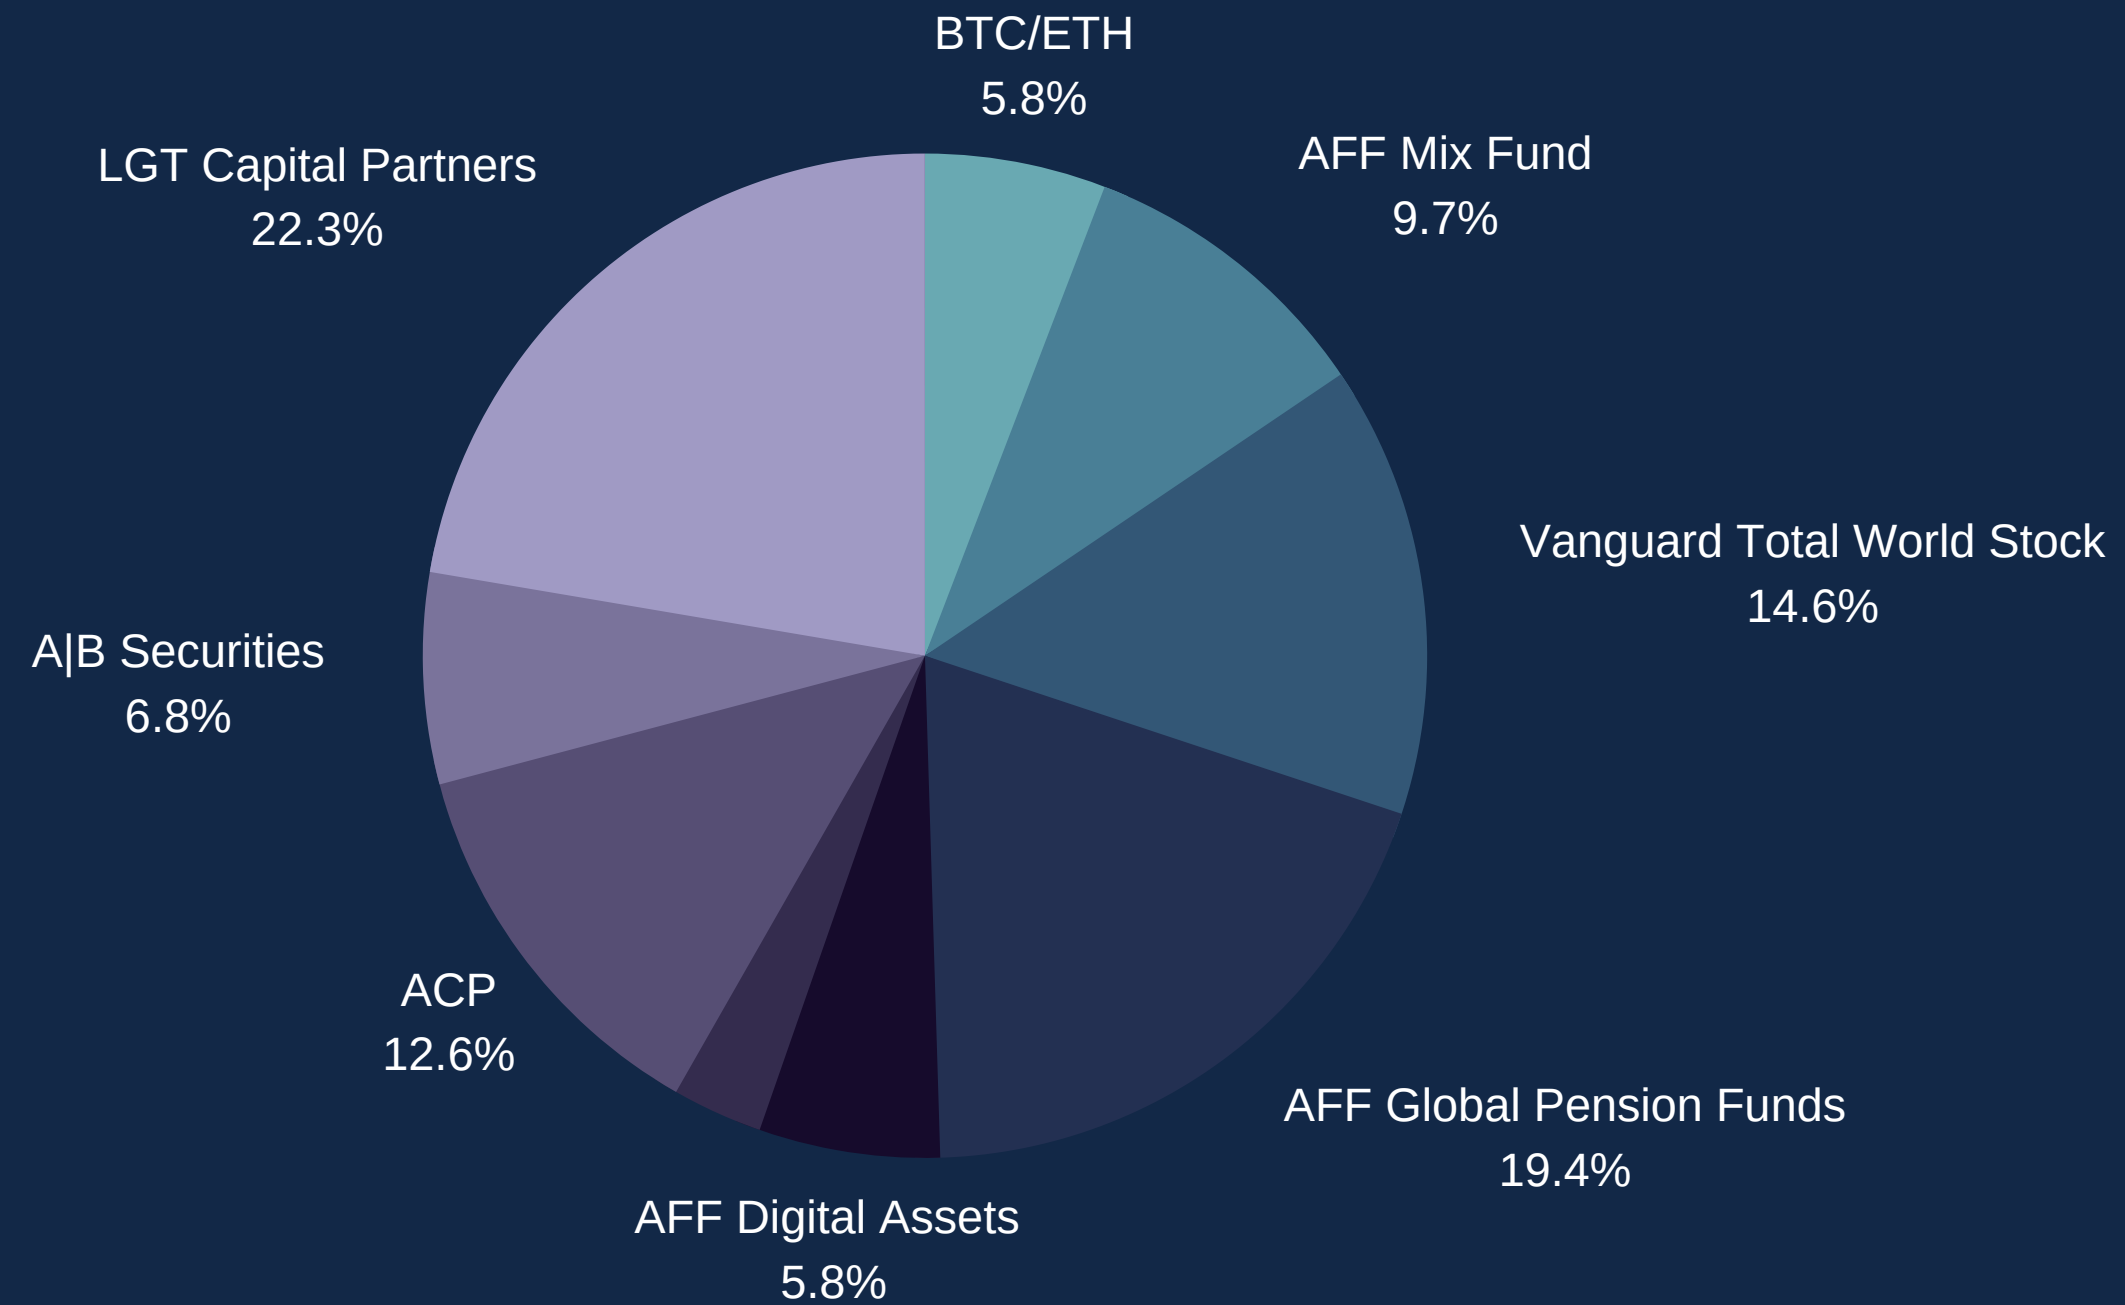

A wide variety of A|B selected long-term growth financial vehicles

A|B MUTUAL FUND

A|B investment strategies with a unique set of principles.

Only for long terms investments - min. 5 years

MUTUAL FUND 2022

COMPOUND INTEREST FUNDS

soon as an alternative investment product at A|B

Digital Asset Funds

A new dimension of ownership, transparency
and globally regulated digital asset funds.

FOUNDATION

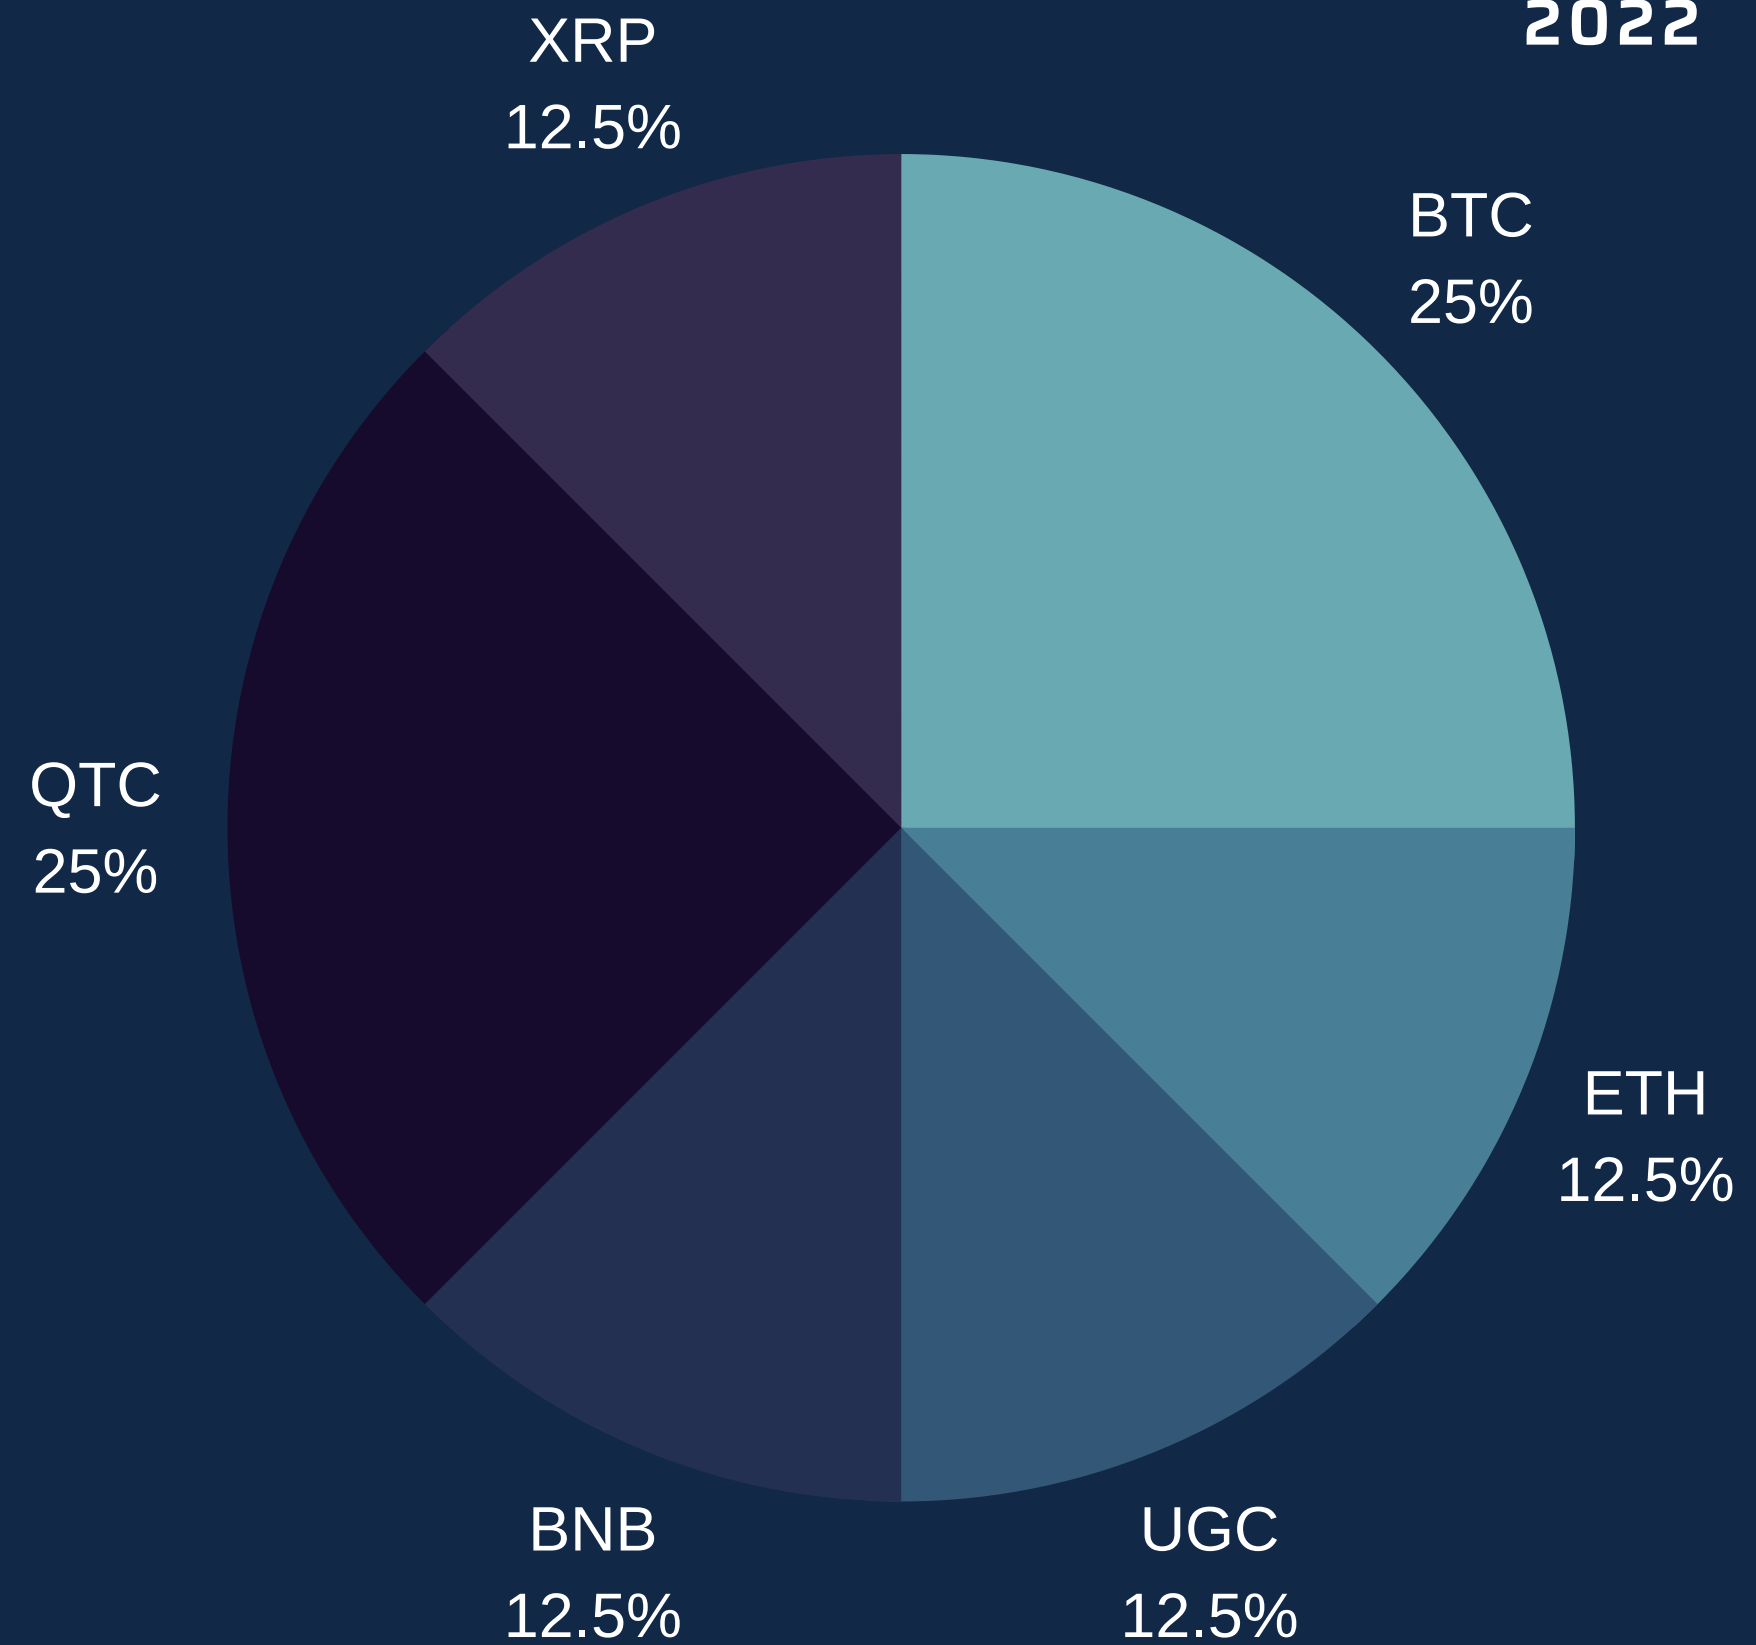

DIGITAL ASSET FUNDS

A|B

ONLY FOR LONG TERMS INVESTMENTS - MIN. 2 YEARS

DIGITAL ASSET FUNDS 2022

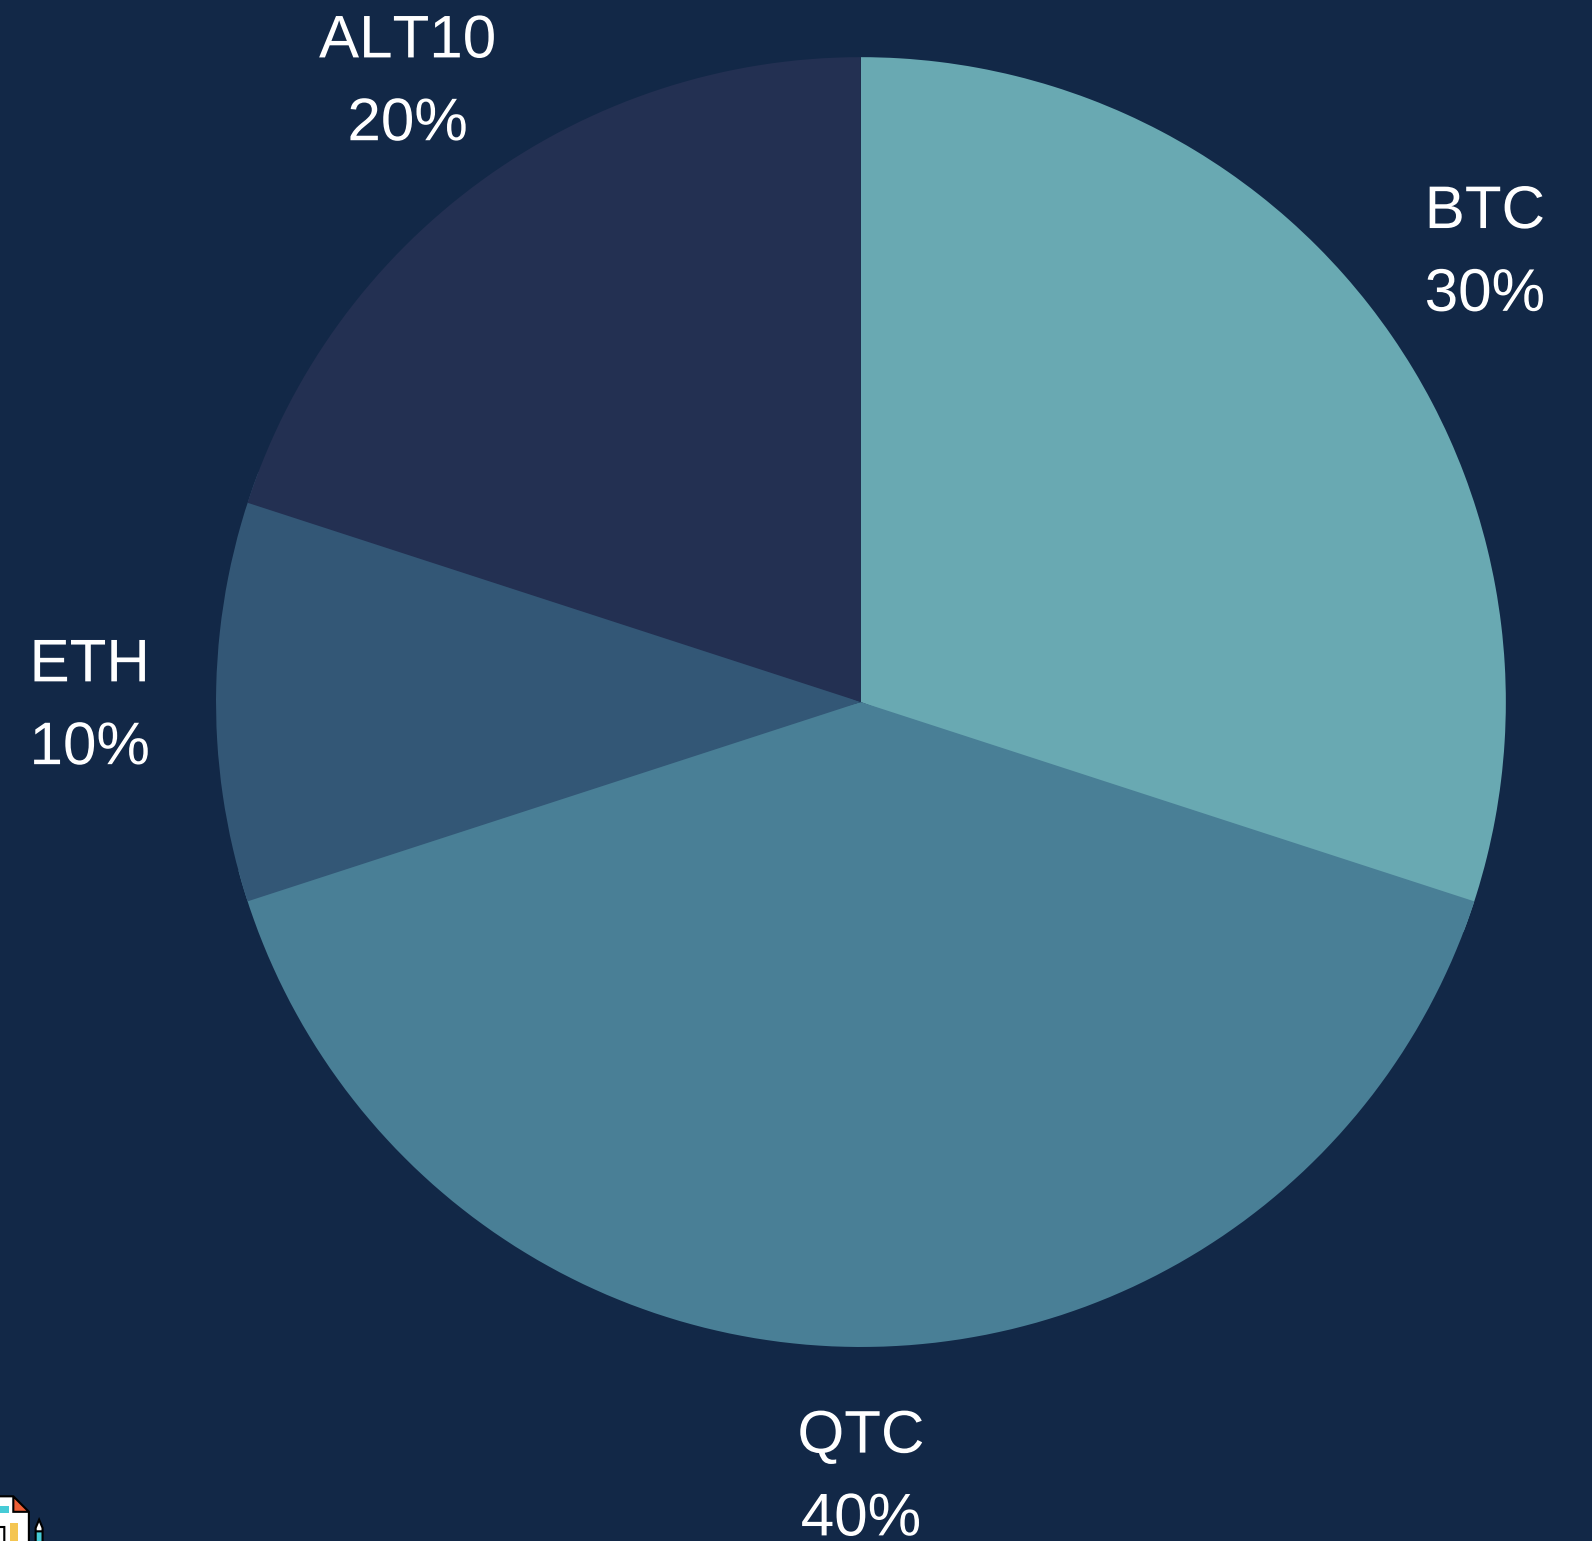

AGGRESSIVE DIGITAL ASSET FUNDS

Full fund description presented July 2022

AGGRESSIVE DIGITAL ASSET FUNDS 2022

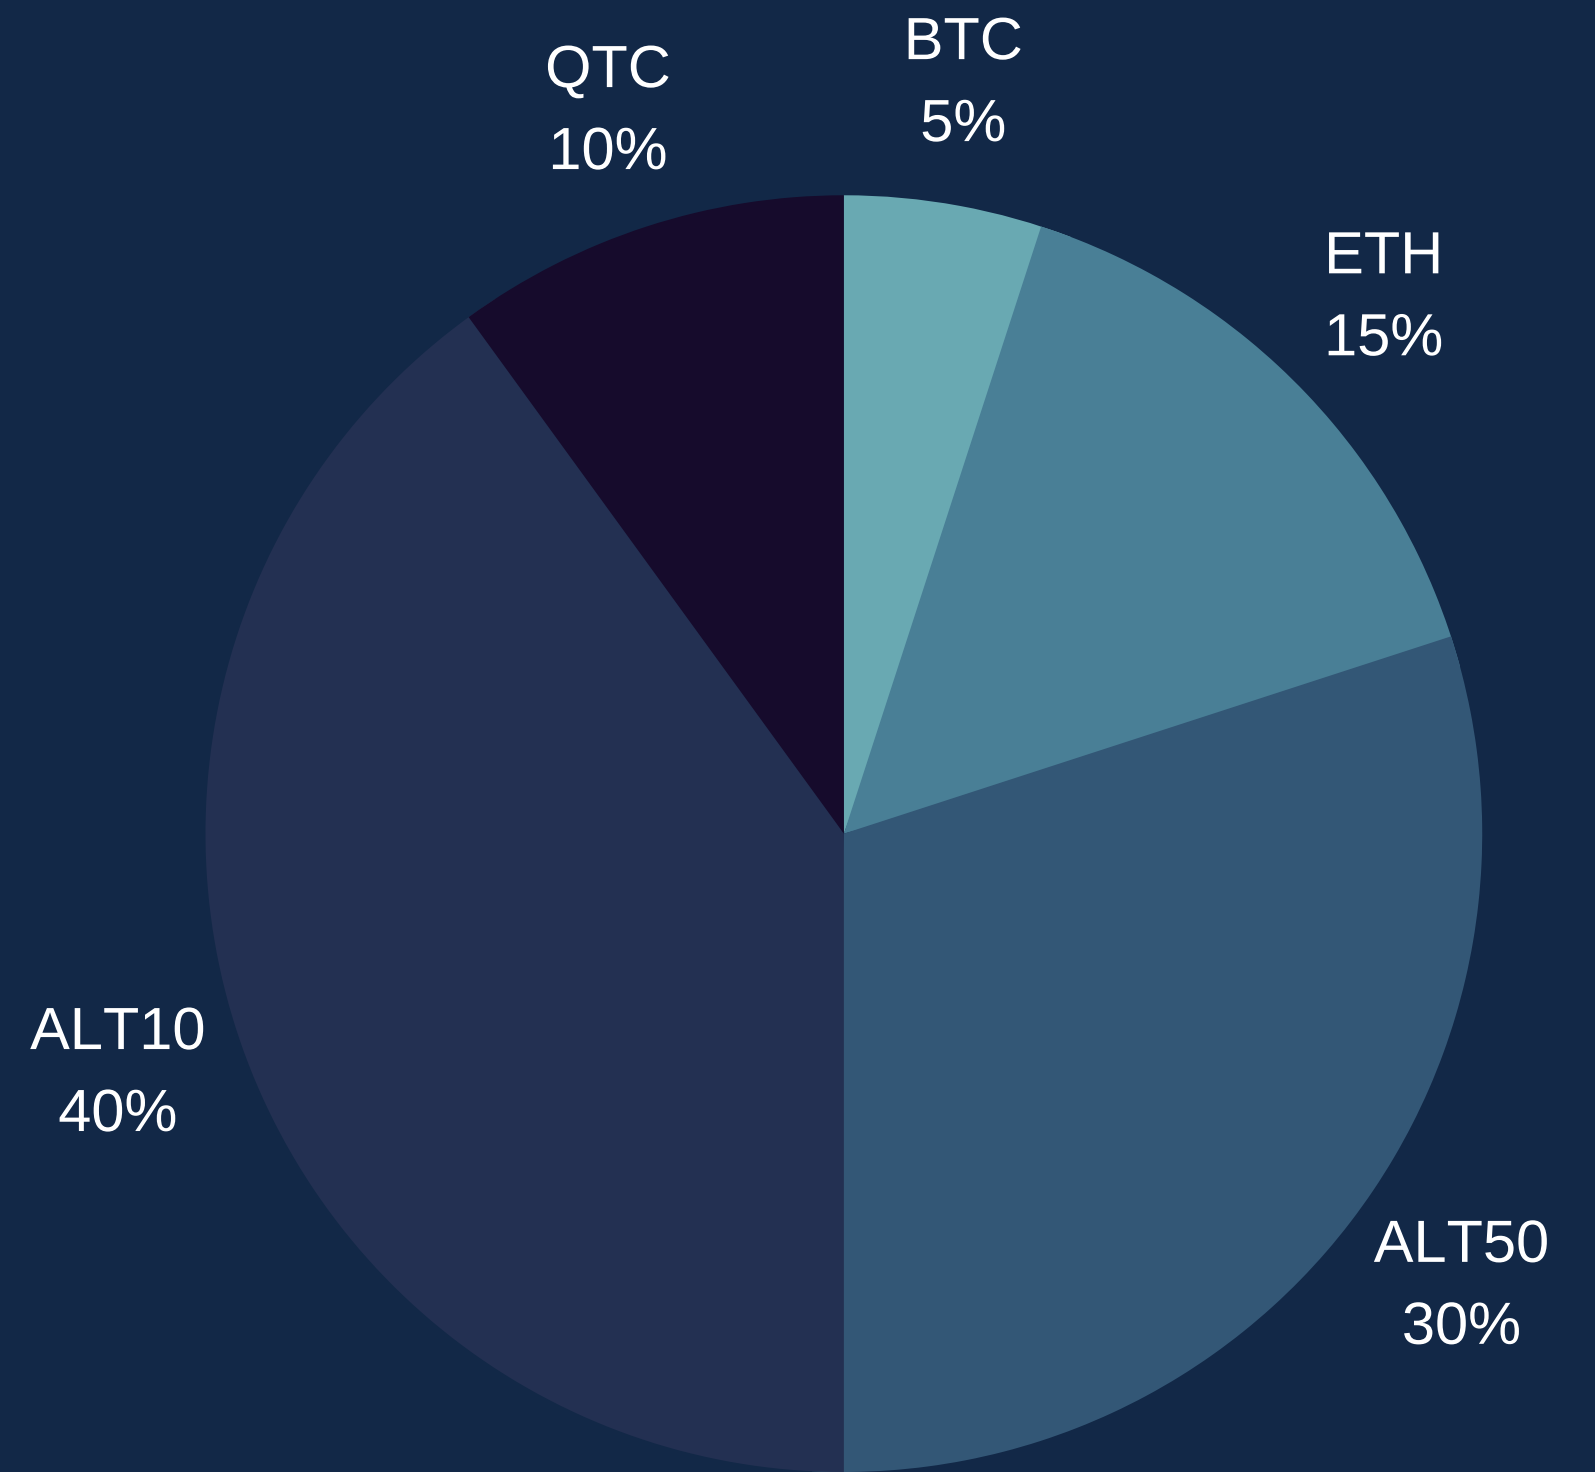

ALTERNATIVE DIGITAL ASSETS FUNDS

Full fund description presented Nov 2022

ALTERNATIVE DIGITAL ASSETS FUNDS 2022

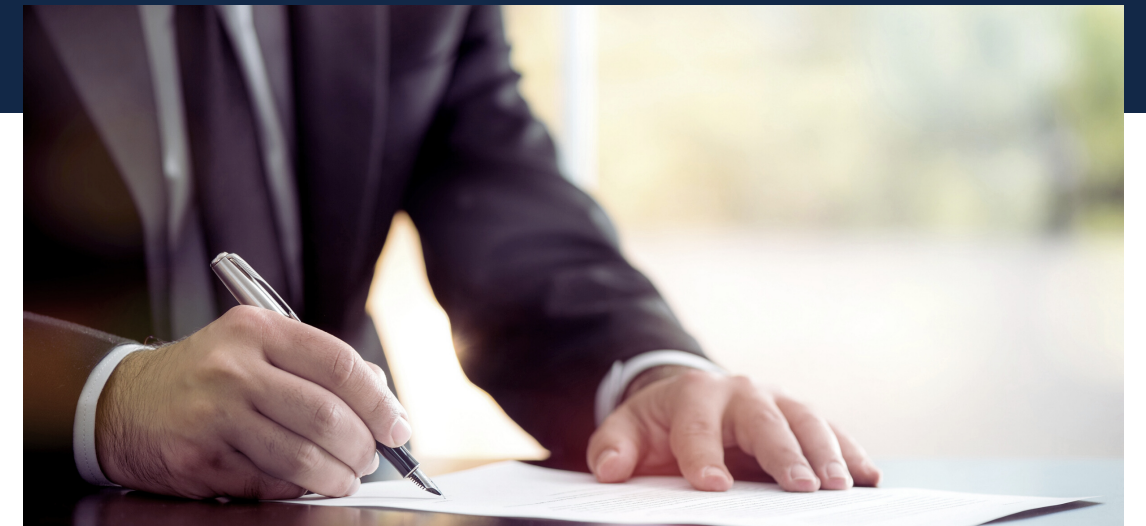

HOW TO START INVESTING

1. Identify investment objectives and set purpose and goals.

2. Determine and set timeline of your investment plan.

3. Choose your investment funds.

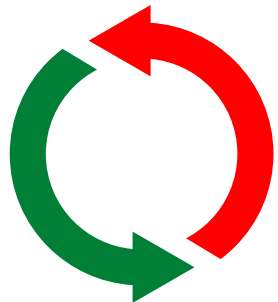

Contact us via the Foundation's homepage and sign conveniently online via DocuSign or in person at our representative offices.

After signing the investor contract, a customer number and reference code will be generated for the investment.

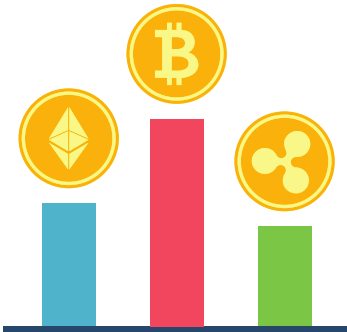

GAIN INSTANT ACCESS TO DIGITAL ASSETS MARKETS

Fiat or Crypto Deposit

Exchange with no or lowest market fees

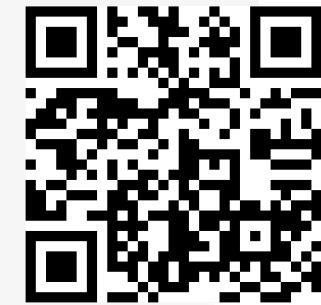

Digital Assets Wrapped Products (DAWPs) held in regulated investment funds
